

WESTECH WOLF™

Full Size Hydro Excavator

Founded in 1988, in western Canada, Westech has since been building rugged code and non-code certified vacuum trucks to serve the oil and gas industry.

Today, the Westech brand remains synonymous with quality, tough and durable design, with innovative enhancements to increase productivity.

STANDARD FEATURES

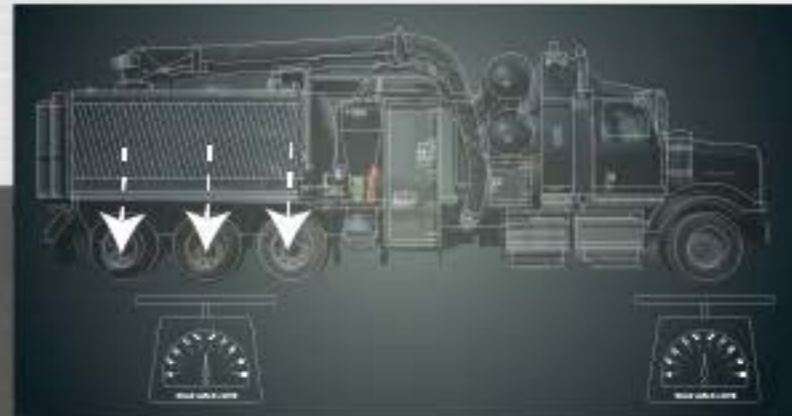

14 CUBIC YARD DEBRIS BODY

1,500 US GALLON WATER CAPACITY IN SIDE MOUNT ALUMINUM WATER TANKS

5,250 CFM 28" HG TRI-LOBE BLOWER

20 GPM @ 3,000 PSI WATER PUMP

800K BTU WATER HEATER

Westech's design keeps the centerline for the water tank and debris body the same. This way, as water is reduced and debris is loaded, the weight increases on the individual axles equally. Westech makes it possible to proportionately distribute the payload across the axles simultaneously by positioning the debris body in the optimal spot on the chassis - achieving the objective of reaching maximum legal payload.

THE WESTECH ADVANTAGE

MORE PAYLOAD

Each unit is engineered using our 3D modeling & weight distribution programs to optimize each customer's build - maximizing the legal payload capacity. Our goal is to efficiently use as much axle capacity as possible while keeping the design safe and productive, resulting in more time on the job and fewer overweight penalties.

BUILT FOR COLD WEATHER

Westech units have been operating in some of the harshest environments for over 30 years. We've learned how to build equipment that will thrive in these conditions.

All of our products come standard with: heated compartments, heated valves, heated water lines, and more.

1. MODULAR DESIGN

Fully customizable design allows for different chassis & axle configurations, as well as custom vacuum & water systems.

2. INDUSTRIAL GRADE CONTROLS

Robust system which results in faster troubleshooting, getting you back to work if and when an issue does arise.

3. IMPROVED PRODUCTIVITY

The 45° dumping debris body & fully opening rear door, with hydraulically powered tank vibrator, make offloading fast & efficient.

4. PERFORMANCE YOU EXPECT

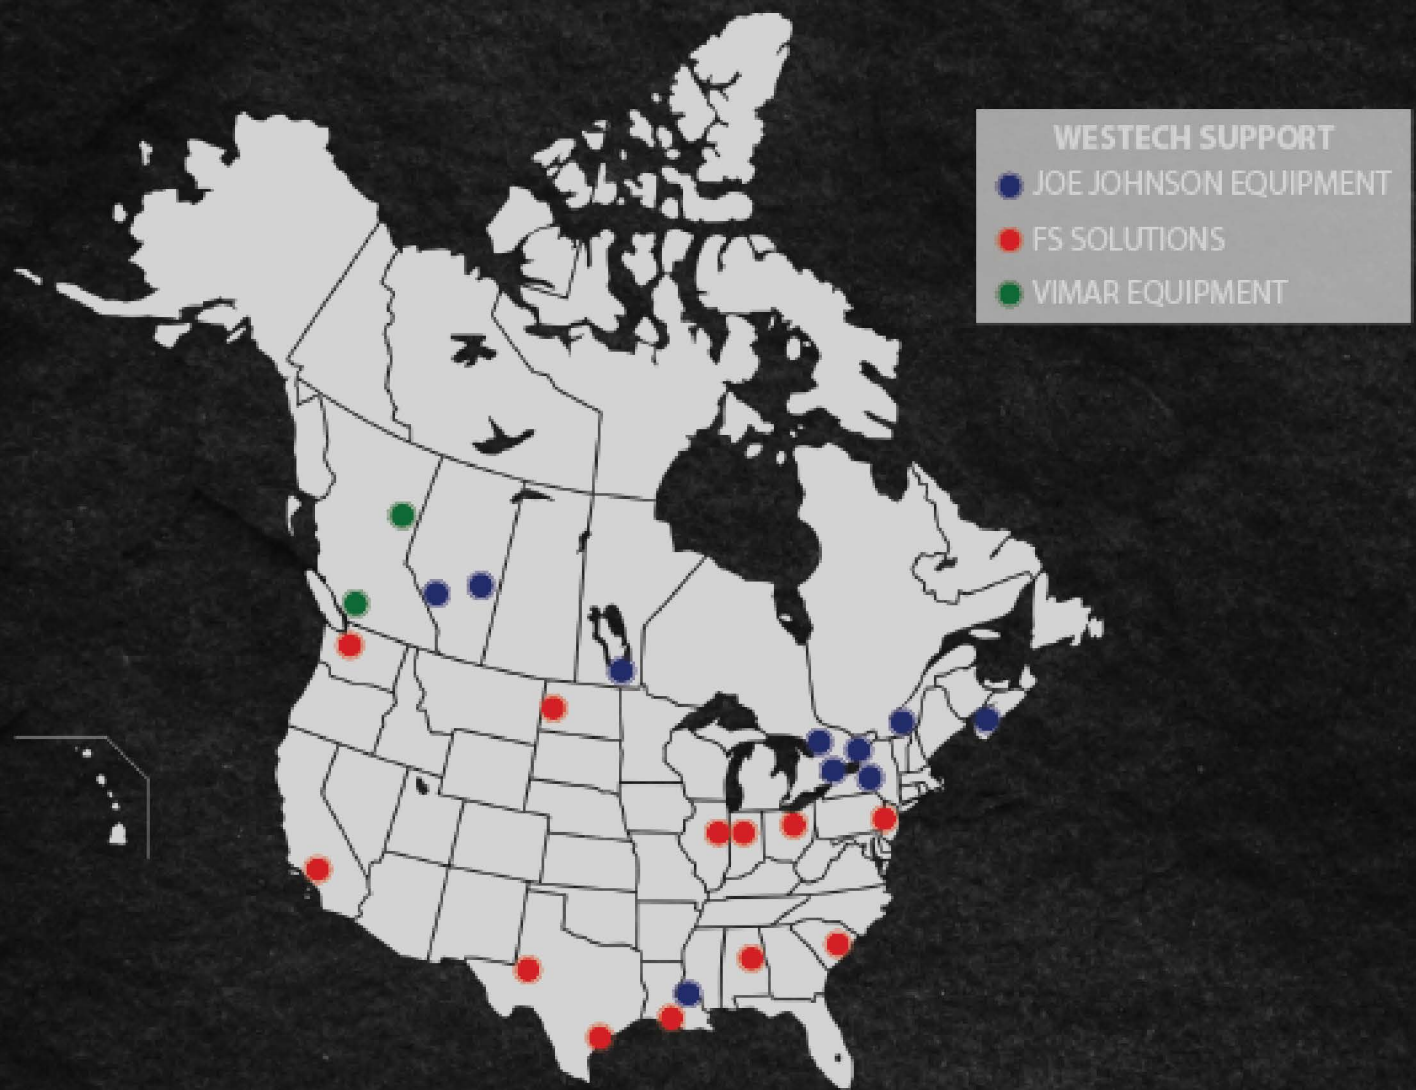

A powerful vacuum & water system with 26' reach boom & wireless controls to get even the biggest & toughest jobs done.

WESTECH™

We've Got Your Back.

Built in Alberta, supported across North America.
